

Irregular Parts

We offers a diverse range of plastic for CNC machining, with applications in a variety of industries. Ideal for one-off prototypes as well as end-use custom parts.

• Competitive Price • Fast turnaround • Material Certificates • Global Delivery

Plastic CNC Turning

Plastic CNC Milling

We stock a variety of thermoplastic materials for production parts:

Plastic Material	Description
HDPE	Impact resistant, tensile strength, and chemical and corrosion resistant
Nylon 6	Excellent bearing and wear properties. Good overall mechanical properties
PAC 6 30% Glass Filled	High heat deflection combined with superior wear and abrasion resistance.
UHMW	No moisture absorption and self lubricating. Retains physical properties down to -30°C
Polypropylene	Versatile, all-purpose thermoplastic that is easy to machine and low cost.

Machined Parts
